

Compressed Wood Pallet Making Machine

Senyu is one of the famous China Compressed Wood Pallet Making Machine manufacturers and Compressed Wood Pallet Making Machine suppliers. We design and produce the Compressed Wood Pallet Making Machine for more than 6 years. The press wood pallet is a good alternative for the traditional wood pallet, it can save your budget, stock space and shipping cost by choosing the. When you have regular demand of the pallet, it is better to install the Compressed Wood Pallet Making Machine, and produce the

press wood pallet locally, it will greatly reduce the cost by mass production locally. Most of our products are export to European, American, Asian countries and we look for long term partners in all countries in all areas.

Product Introduction

High quality Compressed Wood Pallet Making Machine made in China. Senyu is a Compressed Wood Pallet Making Machine manufacturer and supplier in China. We've got a highly efficient group to deal with inquiries from shoppers. Our purpose is "100% client fulfillment by our product high-quality, price tag & our staff service" and enjoy a superb reputation amongst clientele. With quite a few factories, we will provide a wide variety of 2019 High quality China Hot Compressed Wood Block Making Machine, Lots of years of get the job done experience, we have realized the importance of providing top quality merchandise along with the very best before-sales and after-sales solutions. 2019 High quality China Wood Pallet Making Machine, Wood Pallet Machine, We are adhering to the philosophy of "attracting customers with the best solutions and excellent service". We welcome customers, business associations and friends from all parts of the world to contact us and seek cooperation for mutual benefits.

Compressed Wood Pallet Making Machine Factory and Manufacturers

Product Introduction of Compressed Wood Pallet Making Machine

The Compressed Wood Pallet Making Machine, includes wood chipping machine molding press machine, crushers, dryers, glue mixers, storage bins, etc. The production line has been designed by our company for many years of production experience, with good stability, high production

efficiency, low energy consumption, and flexibility. It is convenient to change the press molds, can produce various specifications of pallets, easy to install, does not require basic positioning. This machine has a reasonable design and structure. And we can send our worker to install or provide video instruction on how to install it. And good after sales service, we also produce the press wood pallet, so we can solve any possible problems during production.

Applications of Compressed Wood Pallet Making Machine

The Compressed Wood Pallet Making Machine is used to produce high quality press wood pallet, it is a good alternative of the traditional wood pallet. It can use in the all the industries using traditional wood pallet, and we can customize the size and design to meet your requirement. It has a wide range of uses, suitable for packaging, transportation, and turnover of building materials, electrical, hardware, food, chemicals, furniture and machinery together with goods, and are especially suitable for container trucks (container trucks). It can be used for trains, automobiles, airplanes and ships for mechanized loading and unloading operations. It can also be used as a backing board for docks, shopping malls, warehouses and cargo stacks. It is an ideal tool for warehousing, exporting and logistics.

Advantage of Compressed Wood Pallet Making Machine

Our company focuses on the production of Compressed Wood Pallet Making Machine, and

launches of a molding machine with superior performance and extra-large pressure design, producing molded pallets with better strength, which are loved by customers at home and abroad.

- (1) Higher pressure: the actual working pressure reaches 1000T.
- (2) Can improve product quality: better pallet strength and relatively smoother surface.
- (3) Large size: the maximum processable size is 1300×1200mm.
- (4) Good stability, super high-cost performance.

How to use Compressed Wood Pallet Making Machine to produce the pallet

First the wasted wood was put into the chipping machine and chip it to fine wood chips. The fine wood chips are dried by a dryer, then mixed with thermosetting resin, and placed in a press for compression molding. The entire production process is carried out under high temperature and high pressure to kill any insects and fungi remaining in the wood. At the same time, due to the high density of the wood products produced, it can prevent any other insects from reproducing and re-invading. This kind of molded product is "artificial wooden packaging material" instead of the traditional "solid wood packaging material". Its products no longer need to be treated with insects, and there are no live insects in the products. It meets ISPM15 (International Standard for Phytosanitary Measures 15). The demand for exporting wood packaging products, and after various service life cycle fatigue tests, can be shipped with the goods to other countries without any special treatment.

5. Attentions on stock and use of the Compressed Wood Pallet Making Machine

1. Materials containing wood fiber refer to bagasse, bamboo, waste wood, short wood, straw, etc.

2. Anything containing wood fiber can be used as a raw material. Therefore, a wide range of raw material sources saves the manufacturing cost of the product to a large extent.
3. In order to ensure that the raw materials and glue are evenly mixed, the moisture content of the dried raw materials should be maintained at 5%
4. The adhesive mentioned above is phenolic glue or other glues.

5. In actual use, the measurement of tray performance depends on static load and dynamic load load
